THE SIXTY-SEVENTH REPORT OF THE REGISTRAR-GENERAL ON THE VITAL STATISTICS OF QUEENSLAND FOR THE YEAR 1926.

The 1926 Annual Report of the Vital Statistics for the State of Queensland is herewith presented.

The following tables enumerating and classifying the Births, Marriages, and Deaths which occurred during the year are given.

On the 4th April, 1921, the Commonwealth Government took a Census of the people of Australia, but the compilation of the tables and report thereon is still incomplete.

BIRTHS.

The births registered during the year numbered 19,765—10,132 males and 9,633 females—517 less than in the previous year, 1925. The birth rate declined from 23·82 in 1925 to 22·58 in 1926. The same is common to all the Australian States, and whether the proposed Child Endowment Schemes that are now suggested will make any appreciable difference is a matter for conjecture. This, with an increasing population from year to year, is a matter for serious consideration. The birth rate for Queensland fell from 27·58 in 1920 to 22·58 in 1926, just 5 per cent.

MARRIAGES.

6,428 marriages were registered in Queensland during 1926, a decrease of 43 on those for the previous year. Included in these marriages were 257 males and 1,511 females under the age of twenty-one years. 6,153 marriages were celebrated by ministers and 275 in Registry Offices. The rate per 1,000 of the mean population fell from 9·08 in 1920 to 7·34 in 1926. The decline in the marriage rate is another matter for consideration as this will be reflected in the birth rate. The following are the numbers of marriages celebrated by the principal religious denominations:—

Church of England	2,002
Roman Catholic	1,475
Methodist	1,070
Presbyterian	942
Other Denominations	664
By Registrars	275
	6,428

DEATHS.

The deaths numbered 8,215, of whom 5,021 were males and 3,194 females, being an increase of 671 on those for the previous year. The death rate per 1,000 of the mean population showed an increase of 0·53 on that for the previous year.

The principal causes of death were:—

Heart Disease, all kinds	1,278
Cancer, all kinds	773
Senility	530
Early Infancy, &c.	483

The Infantile Mortality for the year 1926 shows a slight increase of 0·50 on that for the previous year of 1925, viz., from 4·54 in 1925 to 5·04 in 1926.

NOTE.—The amount actually realised bears but a small proportion to the amount sought to be recovered; but it must be borne in mind that in many cases the defendant, on a levy being made, becomes insolvent, and any property seized passes to the Official Trustee for the benefit of the Creditors, and consequently no sale by the Sheriff takes place. Many also of these writs of *fieri facias* were for large amounts, the suitors holding mortgages over and being in possession of the property seized, and were merely lodged for the purpose of obtaining the Sheriff's title for the conveyance of the interest, the purchase money being nominal.

§ Crushed in Bundaberg.

‡ The tonnage of sugar shown in each district was manufactured by the mills in the districts mentioned, but as the cane of one district is often crushed by a mill in another district the sugar is not necessarily made from the tonnage of cane shown in the preceding column.

N.B.—According to the "Imperial Food Journal," it is proposed to form a Sugar Federation of the British Empire, and steps in that direction are being considered by a committee representing all the sugar-producing and many of the sugar-using interests of the Dominions. At present most of the Empire cane sugar comes from Mauritius, West Indies, British Guiana, Australia, and India, but the total is only about 16 per cent. of the aggregate import of sugar into the United Kingdom. Now that an Empire preference is operative, the time is ripe for an organised effort to encourage the Empire to grow most, if not all, of the sugar refined in Great Britain.
